

District Plan Bulletin Series

Bulletin Series Overview

April 2020

Canada Lands Company (Canada Lands), with the support of their consultant team are producing a series of Bulletins as part of the consultation process for developing the William Baker District Plan. The purpose of the Bulletins is to synthesize key topics discussed and respond to community questions from the first two phases of the consultation process.

Project Overview:

William Baker is one of five neighbourhoods surrounding Downsview Park. It consists of approximately 62 acres (25 hectares) located between Keele Street and Sheppard Avenue West. The mature woodlot is at the heart of the new neighbourhood, providing and creating a quiet spot for people to enjoy nature in the city. The opportunities for the community will include housing and a mix of other uses to serve both new residents and those who already live nearby.

For more information, including details about the consultation process, please visit the project website at www.williamsbakerneighbourhood.ca

Bulletin Series:

The Bulletin series will include information on a number of topics to share information and respond to feedback received during the first two phases of consultations. The Bulletins will be distributed and made available on the project website as they become available.
